## Some Examples of how to read Telstra Plans

# The 5 Ps of Safe Excavation

<https://www.byda.com.au/before-you-dig/best-practice-guides/>

## Plan

Plan your job. Use the BYDA service at least one day before your job is due to begin, and ensure you have the correct plans and information required to carry out a safe project.

## Prepare

Prepare by communicating with asset owners if you need assistance. Look for clues onsite. Engage a Certified Locator.

## Pothole

Potholing is physically sighting the asset by hand digging or hydro vacuum extraction.

## Protect

Protecting and supporting the exposed infrastructure is the responsibility of the excavator. Always erect safety barriers in areas of risk and enforce exclusion zones.

## Proceed

Only proceed with your excavation work after planning, preparing, potholing (unless prohibited), and having protective measures in place.

# Form 17

## Final inspection certificate – swimming pools and swimming pool fencing

This Form 17 is to be used for the purposes of sections 239(2)(b), 240 of the Building Act 1975 and/or sections 53 and 60 of the Building Regulation 2021.

**Note:** a Form 16 – Inspection certificate is to be used for temporary swimming pool fencing.

## 5. Restrictions on the use or occupation of the swimming pool or swimming pool safety barrier

If the building work uses a building solution restricting the use or occupation of the swimming pool or swimming pool safety barrier, state the restriction.

For example, a restriction requiring a minimum depth for a permanent body of water forming part of a swimming pool safety barrier to be maintained.

### Restrictions

The following restrictions apply to the use or occupation of the swimming pool or swimming pool safety barrier:

1. The owner must maintain the pool enclosure to ensure it remains compliant, including but not limited to; tension on gate hinges, gate latch self-latching mechanism, surrounding trees. Where the enclosure relies on boundary fencing it is the pool owner's responsibility to ensure development/alterations on neighbouring properties do not make the enclosure non-compliant. If the enclosure relies on the internal 1800mm height and internal 900mm non-climbable zone landscaping and other alterations must not affect this. If there is any doubt regarding these matters a building certifier or pool safety inspector must be consulted.

## 6. Performance solution

If the building work uses a performance solution, state the applicable materials, systems, methods of building, procedures, specifications and other relevant requirements.

This will provide swimming pool owners and occupiers with a concise and practical explanation of performance solutions that may have some operational implications on the use of the swimming pool or swimming pool safety barrier. This will also help ensure the ongoing use of the swimming pool or swimming pool safety barrier and any future modifications do not compromise compliance with the performance requirements of the applicable Queensland Development Code.

### Performance solution requirements

The following systems and procedures form part of the performance solution:

## 7. Certification

This form must be used by building certifiers to certify compliance of swimming pools and swimming pool safety barriers in accordance with s239(2)(b) of the *Building Act 1975* and s53 and s60 of the Building Regulation 2021.

The building certifier must give the owner and assessment manager a copy of the final inspection certificate.

I certify that on an inspection carried out in accordance with best industry practice, the building work was inspected and complies with the building approval and/or certificates of inspection were accepted from competent persons for the swimming pool and its permanent safety barrier.
