Disclosure Statement

Seller disclosure statement

Queensland
Government

Property Law Act 2023 section 99

Form 2, Version 1 | Effective from: 1 August 2025

WARNING TO BUYER – This statement contains important legal and other information about the property offered for sale. You should read and satisfy yourself of the information in this statement before signing a contract. You are advised to seek legal advice before signing this form. You should not assume you can terminate the contract after signing if you are not satisfied with the information in this statement.

WARNING – You must be given this statement before you sign the contract for the sale of the property.

This statement does not include information about:

- » flooding or other natural hazard history
- » structural soundness of the building or pest infestation
- » current or historical use of the property
- » current or past building or development approvals for the property
- » limits imposed by planning laws on the use of the land
- » services that are or may be connected to the property
- » the presence of asbestos within buildings or improvements on the property.

You are encouraged to make your own inquiries about these matters before signing a contract. You may not be able to terminate the contract if these matters are discovered after you sign.

Part 1 – Seller and property details

Seller ADWAIT SATISH KULKARNI, GIRIJA ANAND GADGIL

Property address 75 NELLIE ST, NUNDAH QLD 4012

(referred to as the
“property” in this
statement)

Lot on plan description Lot 125 on RP34489

Community titles scheme or BUGTA scheme: Is the property part of a community titles scheme or a BUGTA scheme:

Yes

*If **Yes**, refer to Part 6 of this statement for additional information*

No

*If **No**, please disregard Part 6 of this statement as it does not need to be completed*

Part 2 – Title details, encumbrances and residential tenancy or rooming accommodation agreement

Title details

The seller gives or has given the buyer the following—

A title search for the property issued under the *Land Title Act 1994* showing interests registered under that Act for the property.

Yes

A copy of the plan of survey registered for the property.

Yes

Registered encumbrances	<p>Registered encumbrances, if any, are recorded on the title search, and may affect your use of the property. Examples include easements, statutory covenants, leases and mortgages.</p> <p>You should seek legal advice about your rights and obligations before signing the contract.</p>
Unregistered encumbrances (excluding statutory encumbrances)	<p>There are encumbrances not registered on the title that will continue <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No to affect the property after settlement.</p> <p>Note—If the property is part of a community titles scheme or a BUGTA scheme it may be subject to and have the benefit of statutory easements that are NOT required to be disclosed.</p> <p>Unregistered lease (if applicable)</p> <p>If the unregistered encumbrance is an unregistered lease, the details of the agreement are as follows:</p> <ul style="list-style-type: none"> » the start and end day of the term of the lease: NA » the amount of rent and bond payable: NA » whether the lease has an option to renew: NA <p>Other unregistered agreement in writing (if applicable)</p> <p>If the unregistered encumbrance is created by an agreement in writing, and is not an unregistered lease, a copy of the agreement is given, together with relevant plans, if any. <input type="checkbox"/> Yes</p> <p>Unregistered oral agreement (if applicable)</p> <p>If the unregistered encumbrance is created by an oral agreement, and is not an unregistered lease, the details of the agreement are as follows:</p> <p>NA</p>
Statutory encumbrances	<p>There are statutory encumbrances that affect the property. <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p><i>If Yes, the details of any statutory encumbrances are as follows:</i></p> <p>Please refer to the Statutory Encumbrance Maps and Summary Annexure for further and better details.</p>
Residential tenancy or rooming accommodation agreement	<p>The property has been subject to a residential tenancy agreement or a rooming accommodation agreement under the <i>Residential Tenancies and Rooming Accommodation Act 2008</i> during the last 12 months. <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If Yes, when was the rent for the premises or each of the residents' rooms last increased? (<i>Insert date of the most recent rent increase for the premises or rooms</i>) 5 March 2025</p> <p>Note—Under the <i>Residential Tenancies and Rooming Accommodation Act 2008</i> the rent for a residential premises may not be increased earlier than 12 months after the last rent increase for the premises.</p> <p>As the owner of the property, you may need to provide evidence of the day of the last rent increase. You should ask the seller to provide this evidence to you prior to settlement.</p>

Part 3 – Land use, planning and environment

WARNING TO BUYER – You may not have any rights if the current or proposed use of the property is not lawful under the local planning scheme. You can obtain further information about any planning and development restrictions applicable to the lot, including in relation to short-term letting, from the relevant local government.

Zoning	<p>The zoning of the property is (<i>Insert zoning under the planning scheme, the Economic Development Act 2012; the Integrated Resort Development Act 1987; the Mixed Use Development Act 199; the State Development and Public Works Organisation Act 1971 or the Sanctuary Cove Resort Act 1985, as applicable</i>):</p> <p>LMR2 Low-medium density residential (2 or 3 storey mix) zone</p>		
Transport proposals and resumptions	<p>The lot is affected by a notice issued by a Commonwealth, State or local government entity and given to the seller about a transport infrastructure proposal* to: locate transport infrastructure on the property; or alter the dimensions of the property.</p> <p style="text-align: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>The lot is affected by a notice of intention to resume the property or any part of the property.</p> <p style="text-align: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p><i>If Yes, a copy of the notice, order, proposal or correspondence must be given by the seller.</i></p>		
<p>* <i>Transport infrastructure</i> has the meaning defined in the <i>Transport Infrastructure Act 1994</i>. A <i>proposal</i> means a resolution or adoption by some official process to establish plans or options that will physically affect the property.</p>			
Contamination and environmental protection	<p>The property is recorded on the Environmental Management Register or the Contaminated Land Register under the <i>Environmental Protection Act 1994</i>.</p> <p>The following notices are, or have been, given:</p> <p>A notice under section 408(2) of the <i>Environmental Protection Act 1994</i> (for example, land is contaminated, show cause notice, requirement for site investigation, clean up notice or site management plan).</p> <p style="text-align: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>A notice under section 369C(2) of the <i>Environmental Protection Act 1994</i> (the property is a place or business to which an environmental enforcement order applies).</p> <p style="text-align: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>A notice under section 347(2) of the <i>Environmental Protection Act 1994</i> (the property is a place or business to which a prescribed transitional environmental program applies).</p> <p style="text-align: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p>		
Trees	<p>There is a tree order or application under the <i>Neighbourhood Disputes (Dividing Fences and Trees) Act 2011</i> affecting the property.</p> <p><i>If Yes, a copy of the order or application must be given by the seller.</i></p>	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Heritage	<p>The property is affected by the <i>Queensland Heritage Act 1992</i> or is included in the World Heritage List under the <i>Environment Protection and Biodiversity Conservation Act 1999</i> (Cwlth).</p>	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Flooding	<p>Information about whether the property is affected by flooding or another natural hazard or within a natural hazard overlay can be obtained from the relevant local government and you should make your own enquires. Flood information for the property may also be available at the FloodCheck Queensland portal or the Australian Flood Risk Information portal.</p>		
Vegetation, habitats and protected plants	<p>Information about vegetation clearing, koala habitats and other restrictions on development of the land that may apply can be obtained from the relevant State government agency.</p>		

Part 4 – Buildings and structures

WARNING TO BUYER – The seller does not warrant the structural soundness of the buildings or improvements on the property, or that the buildings on the property have the required approval, or that there is no pest infestation affecting the property. You should engage a licensed building inspector or an appropriately qualified engineer, builder or pest inspector to inspect the property and provide a report and also undertake searches to determine whether buildings and improvements on the property have the required approvals.

Swimming pool	There is a relevant pool for the property.	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
	If a community titles scheme or a BUGTA scheme – a shared pool is located in the scheme.	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
	Pool compliance certificate is given.	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
	OR Notice of no pool safety certificate is given.	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Unlicensed building work under owner builder permit	Building work was carried out on the property under an owner builder permit in the last 6 years.	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
	<i>A notice under section 47 of the Queensland Building and Construction Commission Act 1991 must be given by the seller and you may be required to sign the notice and return it to the seller prior to signing the contract.</i>		
Notices and orders	There is an unsatisfied show cause notice or enforcement notice under the <i>Building Act 1975</i> , section 246AG, 247 or 248 or under the <i>Planning Act 2016</i> , section 167 or 168.	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
	The seller has been given a notice or order, that remains in effect, from a local, State or Commonwealth government, a court or tribunal, or other competent authority, requiring work to be done or money to be spent in relation to the property. <i>If Yes, a copy of the notice or order must be given by the seller.</i>	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Building Energy Efficiency Certificate	If the property is a commercial office building of more than 1,000m ² , a Building Energy Efficiency Certificate is available on the Building Energy Efficiency Register.		
Asbestos	The seller does not warrant whether asbestos is present within buildings or improvements on the property. Buildings or improvements built before 1990 may contain asbestos. Asbestos containing materials (ACM) may have been used up until the early 2000s. Asbestos or ACM may become dangerous when damaged, disturbed, or deteriorating. Information about asbestos is available at the Queensland Government Asbestos Website (asbestos.qld.gov.au) including common locations of asbestos and other practical guidance for homeowners.		

Part 6 – Community titles schemes and BUGTA schemes

(If the property is part of a community titles scheme or a BUGTA scheme this Part must be completed)

WARNING TO BUYER – If the property is part of a community titles scheme or a BUGTA scheme and you purchase the property, you will become a member of the body corporate for the scheme with the right to participate in significant decisions about the scheme and you will be required to pay contributions towards the body corporate’s expenses in managing the scheme. You will also be required to comply with the by-laws. By-laws will regulate your use of common property and the lot.

For more information about living in a body corporate and your rights and obligations, contact the Office of the Commissioner for Body Corporate and Community Management.

Body Corporate and Community Management Act 1997	<p>The property is included in a community titles scheme. <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p><i>(If Yes, complete the information below)</i></p>
Community Management Statement	<p>A copy of the most recent community management statement for the scheme as recorded under the <i>Land Title Act 1994</i> or another Act is given to the buyer. <input type="checkbox"/> Yes</p> <p>Note—If the property is part of a community titles scheme, the community management statement for the scheme contains important information about the rights and obligations of owners of lots in the scheme including matters such as lot entitlements, by-laws and exclusive use areas.</p>
Body Corporate Certificate	<p>A copy of a body corporate certificate for the lot under the <i>Body Corporate and Community Management Act 1997</i>, section 205(4) is given to the buyer. <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p><i>If No</i>— An explanatory statement is given to the buyer that states: <input type="checkbox"/> Yes</p> <ul style="list-style-type: none"> » a copy of a body corporate certificate for the lot is not attached; and » the reasons under section 6 of the <i>Property Law Regulation 2024</i> why the seller has not been able to obtain a copy of the body corporate certificate for the lot.
Statutory Warranties	<p>Statutory Warranties—If you enter into a contract, you will have implied warranties under the <i>Body Corporate and Community Management Act 1997</i> relating to matters such as latent or patent defects in common property or body corporate assets; any actual, expected or contingent financial liabilities that are not part of the normal operating costs; and any circumstances in relation to the affairs of the body corporate that will materially prejudice you as owner of the property. There will be further disclosure about warranties in the contract.</p>
Building Units and Group Titles Act 1980	<p>The property is included in a BUGTA scheme <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p><i>(If Yes, complete the information below)</i></p>
Body Corporate Certificate	<p>A copy of a body corporate certificate for the lot under the <i>Building Units and Group Titles Act 1980</i>, section 40AA(1) is given to the buyer. <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p><i>If No</i>— An explanatory statement is given to the buyer that states: <input type="checkbox"/> Yes</p> <ul style="list-style-type: none"> » a copy of a body corporate certificate for the lot is not attached; and » the reasons under section 7 of the <i>Property Law Regulation 2024</i> why the seller has not been able to obtain a copy of the body corporate certificate for the lot. <p>Note—If the property is part of a BUGTA scheme, you will be subject to by-laws approved by the body corporate and other by-laws that regulate your use of the property and common property.</p>

- Northgate SS
- Aviation High

CLOSEST CITY

Brisbane - 8km

Zoning

What zone is my property?

Sources: Brisbane City Council

THINGS TO KNOW

Zoning helps organise cities and towns by dividing properties into specific land use types, such as commercial, residential, industrial, agricultural, and public-use. This structured approach prevents disorderly development, making cities and towns more livable, navigable, and attractive.

Zoning rules determine how land can be used and developed, including identifying desirable developments like townhouses or apartment units near public transport. Zoning may also impose restrictions on building heights to preserve local neighbourhood views.

Local area plans provide even more specific details to protect an area's unique character or encourage growth in suitable places. These plans can modify zoning rules and influence development possibilities, supporting economic growth, preserving local identity, providing open spaces, and improving transport routes.

Note: To determine the development possibilities for your property, it's essential to review the planning documents provided by local authorities, contact directly, or consult with a practising town planner.

Questions to ask

- What does the zoning and local plan mean for the property?
- What land uses are suitable for the applicable zone and/or local plan?

LEGEND

-  Selected Property
-  Cr2 Character Residential (Infill Housing)
-  Lmr2 Low-Medium Density Residential (2 Or 3 Storey Mix)

Local Plans

Is my property in a Local Area or Neighbourhood Plan?

Sources: Brisbane City Council

THINGS TO KNOW

Local Area and Neighbourhood Plans provide more detailed planning guidance for specific parts of a suburb or town. They sit within the local planning scheme and work alongside zoning to shape how land can be developed.

While zoning sets the general land use, such as residential, commercial or industrial, Local Area Plans can refine or vary zoning rules. They might allow increased building heights in key centres, encourage mixed-use or higher density near transport, or protect local character in established neighbourhoods.

These plans help guide how growth occurs, balancing development with the area's unique identity, access to services, open spaces and transport networks.

Note: Local Area and Neighbourhood Plans differ between councils and are updated over time. Always check the local planning scheme or speak with a town planner or Council officer for current requirements.

Questions to ask

- Does this plan change or override standard zoning rules?
- What design, height or density controls apply?

LEGEND

-  Selected Property
-  Banyo Northgate Neighbourhood Plan
-  Oxenham Park Npp-004
-  Toombul Nundah Neighbourhood Plan

Easements

What access rights exist over the property?

Sources: Queensland Government, Qldspatial

THINGS TO KNOW

Easements are legal rights allowing a person or government authority to access a specific portion of land for a particular purpose. They are commonly required for the maintenance of utilities including large water and sewer pipes, stormwater drains, and power lines. Easements are also created for shared vehicle access through a property or for maintenance of built to boundary walls.

Easements are recorded on a land title and agreed to by the landowner at the time of subdivision. The easement remains on the title even if the land is sold to someone else. Typically, a landowner cannot build permanent structures within an easement area or obstruct the access of the authorised party.

Before building within or over an easement, you must obtain approval from the easement owner and should speak to a building certifier to understand any specific considerations.

Note: The map identifies only publicly registered easements provided by the relevant authority and is not a definitive source of information. You should order a certificate of title & survey plan from the titles office to be sure. Although rare, private covenants or agreements over the land may exist. If you have specific concerns about land entitlements, please contact a solicitor.

Questions to ask

- Does the easement benefit or burden the property?
- Who is responsible for the land within the easement area?
- What other impacts does the easement have on the design of my building?

LEGEND

-  Selected Property
-  Easement Or Covenant
-  Easements

Flood Risk

Is the property in a potential flood area?

Sources: Brisbane City Council

THINGS TO KNOW

If your property is in a potential flood area, it's important to understand the possible risks, impacts and causes of flooding. Flooding commonly happens when prolonged or heavy rainfall causes waterways to rise, overflowing into nearby properties.

The likelihood of a flood is often described using Annual Exceedance Probability (AEP), which shows the chance of a flood happening in any given year. For example, a 1% AEP flood has a 1 in 100 chance of occurring annually.

Building, renovating, or developing in flood-prone areas may require government assessment. For instance, floor heights might need to be built above flood levels, or structures designed to allow water to flow beneath raised buildings.

It is important to check with your local authority (e.g. flood check report) to understand flood risks and access detailed information.

Note: Government flood risk models are broad guides that estimate flood probability and acceptable risk but don't guarantee site-specific accuracy or immunity. They are primarily developed by local authorities to govern future development on that sites to mitigate risks for residents. Newly subdivided lots may have already considered flooding risks and developed above acceptable flood risk levels rendering the mapping invalid. For specific concerns, consult your local authority, local flood check or a qualified professional.

Questions to ask

- What are the building requirements in a potential flood area?
- Can the flood risk be reduced through design measures?
- What is the probability of flooding and is this an acceptable risk for your plans?

LEGEND

-  Selected Property
-  High Likelihood (5.0% Annual Chance)
-  Medium Likelihood (1.0% Annual Chance)
-  Low Likelihood (0.2% Annual Chance)
-  Very Low Likelihood (0.05% Annual Chance)

Overland Flow Flood Risk

Are there any major rainfall issues for this property?

Sources: Brisbane City Council

THINGS TO KNOW

Overland flow refers to water running over the ground's surface during heavy rain. This can happen when stormwater systems are overwhelmed, drainage paths are blocked, or the land cannot absorb water quickly enough.

Unlike river or coastal flooding, overland flow is usually localised but can cause water pooling, damage to structures, and flooding of yards or low-lying areas. Urban areas are particularly vulnerable due to surfaces like roads and concrete, which prevent water from soaking into the ground.

If your property is in an overland flow area, future development of the site may require specific measures like improving drainage, raising building platforms, or adding landscaping features to safely redirect water.

Check with your local authority (e.g. flood check report) to understand flood risks and access detailed information.

PROPERTY DUE DILIGENCE REPORT | 75 NELLIE STREET

Note: Government overland flow maps are general guides and may not reflect site-specific conditions. They are primarily developed by local authorities to govern future development on that sites to mitigate risks for residents. Flooding may still occur outside mapped areas due to local factors. Newly subdivided lots may have already considered flooding risks and designed flows away from residential lots, rendering the mapping invalid. For tailored advice, consult your local authority or a qualified professional.

Questions to ask

- Are there specific regulations for overland flow that affect your property?
- What building or landscaping measures can help manage water flow?

LEGEND

-  Selected Property
-  Overland Flow - Moderate Impact
-  Overland Flow - Low Impact
-  Overland Flow

Flood History

Has the property been impacted by historic flood events?

Sources: Brisbane City Council

THINGS TO KNOW

Knowing about past major flood events on or near a property is important for understanding the risk of future flooding. Government flood prediction models often show the worst-case scenarios, which may not always eventuate. However, knowing the highest previous water levels (flood risk vs flood reality) that have actually occurred can help you plan ways to protect yourself and your property.

Being well-prepared for floods is key to staying safe and reducing damage to property assets. It's important to know where higher ground is and plan safe routes to get there during an emergency.

Note: These reports only reflect major flood events mapped and published by government authorities in open data portals. Other rapid flash flood events that subsided quickly may not be documented.

Questions to ask:

- Where has flooding historically occurred on the property?
- What are the differences between government flood models and recorded flood events?
- Is the government flood model an acceptable level of risk when compared to actual flood events?

LEGEND

-  Selected Property
-  Flood Event - Feb 2022

Coastal Flood Risk

Are there any coastal impacts that impact my property?

Sources: Brisbane City Council

THINGS TO KNOW

Coastal flooding may occur when high tides, storm surges, or severe weather events push seawater inland. Rising sea levels and coastal erosion, caused by waves, tides, and human activities like vegetation removal, can make previously safe areas more vulnerable to flooding.

Building in a potential coastal flood area often requires government approval and mitigation measures. These can include raising floor heights, using materials resistant to saltwater, and installing erosion control features such as seawalls, revetments, or dune restoration.

It is important to check with your local authority (e.g. flood check and/or flood planning report) to understand flood risks and access detailed information.

Note: Government coastal flood risk models provide general guidance but don't account for site-specific conditions or guarantee protection from flooding. They are primarily developed by local authorities to govern future development on that sites to mitigate risks for residents. Newly subdivided lots may have already considered flooding risks and developed above acceptable flood risk levels, rendering the mapping invalid. Check with your local authority or a qualified professional for specific requirements.

Questions to ask

- What are the building restrictions in a coastal flood area?
- Can building designs reduce flood and erosion risks?
- How does coastal erosion impact your property, and what measures can help?

LEGEND

-  Selected Property
-  Medium Storm-Tide Inundation Area

Flood Planning Risk

What planning overlays impact development of this property?

Sources: Brisbane City Council

THINGS TO KNOW

Flood Planning overlays identify areas at risk of flooding from rivers, creeks, stormwater, or coastal inundation. These overlays are used to guide land use and development to minimise flood impacts on people, property, and infrastructure.

Developments in Flood Planning areas must meet specific requirements, such as raising floor levels above designated flood immunity levels or using flood-resilient building materials. In some cases, developments may not be permitted in high-risk zones unless engineering solutions, such as stormwater detention basins or elevated structures, are implemented.

Note: Flood Planning overlays are based on broad modelling assumptions, are general in nature and are a tool for managing flood risk as it relates to development of the property. They do not guarantee individual property immunity from flooding or account for site-specific conditions. Newly subdivided lots may have already considered flooding risks and developed above acceptable flood risk levels, rendering the mapping invalid. Check with your local authority or a qualified professional for specific requirements.

Questions to ask

- What restrictions apply to developing in a Flood Planning area?
- Are there required flood immunity levels or design standards?
- How do overlays account for future changes like climate impacts or urban growth?

LEGEND

-  Selected Property
-  Planning Area 3 - Moderate Risk
-  Overland Flow Flood Planning Area
-  Planning Area 4 - Low Risk
-  Planning Area 5 - Very Low Risk

State Flood Planning

What State overlays impact development of this property?

Sources: Queensland Department Of Environment And Science

THINGS TO KNOW

State Government Flood Planning overlays identify areas at risk of flooding from rivers, creeks, stormwater or coastal inundation. These overlays are prepared by the State, to provide a broad understanding of flood behavior across large areas and are often used to guide regional planning, infrastructure design and land use strategies.

The State may undertake flood studies in certain areas to determine potential impacts across large catchments for a range of purposes. This information is generally broad in nature and should be interpreted with caution when considering flood impacts at an individual property level. The existence of a State flood study over a property does not always indicate flood risk for that property, especially for urban residential properties. If available, **local Council flood models should be referred to for more accurate, site specific assessment in residential areas.**

Relevant State flood models have been included in Develo reports as they provide useful coverage for rural and regional areas, where local government data may not be available. Some State Government flooding data is statutory for developers and, if the development is of a sufficient scale, applications may need to be referred to the relevant authority for assessment.

Note: Flood Planning overlays are based on modelling assumptions and are general in nature. They do not guarantee property immunity from flooding or account for site-specific conditions. Newly subdivided lots may already have addressed flood risks in their design, which may render broad State mapping irrelevant.

Questions to ask

- What restrictions apply when developing in State identified flood areas?
- Does my development need to be referred to the State for assessment?

LEGEND

-  Selected Property
-  State Coastal – Moderate Storm Tide Inundation Area

Character

Is the property in a character or heritage area?

Sources: Brisbane City Council

THINGS TO KNOW

Heritage and character places are generally to be retained or restored to preserve their unique character value and charm. Any extensions or alterations to existing heritage buildings should complement the traditional building style of the area. There may also be demolition restrictions for existing heritage buildings.

If a property is identified in a character area, any new houses or an extension to a house **may** need to be designed to fit in with the existing building character of the area.

Note: It is not only houses or buildings that are protected by heritage values, there may be structures or landscape features on site that are protected by heritage values. It is essential to consult with the local authority, town planner or a building certifier for guidance on heritage places.

Questions to ask

- Is the property protected by Character or Heritage restrictions?
- What impacts do these restrictions have on renovations, extensions, or new builds?
- Is approval required for works under Character or Heritage restrictions?
- How does this consideration positively or negatively impact the property?

LEGEND

-  Selected Property
-  Traditional Building Character - Neighbourhood

Historic Imagery

Historic Aerial Imagery

THINGS TO KNOW

Houses built before a certain historical period (e.g., pre-1946) are generally required to be preserved, with any extensions or alterations designed to complement their original architectural style.

If historic records or aerial imagery show a house on the site and the original structure remains, it may be protected by heritage regulations. Heritage and character provide a vital link to the past, showcasing a city's evolution while offering opportunities to celebrate and shape its future identity.

New homes in these areas should be designed to complement the existing streetscape and maintain the area's character and charm.

Advice from a town planner or heritage architect is recommended if the property is identified as built in or before a historical period to ensure compliance with regulations.

Questions to ask:

- Is the property protected by Character protection?
- Can the building be demolished or modified?
- How do these protections affect renovations, extensions, or new builds?

LEGEND

 Selected Property

Vegetation

Is the property in an area with vegetation protection?

THINGS TO KNOW

Properties located in protected vegetation areas may have tree clearing restrictions over the native vegetation or significant vegetation on the property. Your property may have vegetation protection if it:

- is located near a river, creek or a waterway corridor
- is located in a bushland area or rural area with native vegetation
- contains large significant trees even in an urban area
- the trees have heritage values and cultural sentiment

If these features are present, your property may contribute to the preservation of important environmental or cultural values. In these cases, planning controls may apply to help guide how vegetation is managed or how land can be developed.

Note: The map provided identifies areas that may have restrictions on tree clearing of native vegetation or significant. The mapping is based on broad modelling assumptions and does not assess each site individually. Newly subdivided lots may already have considered protected vegetation in the design of the subdivision and removal of vegetation approved by Council. To obtain accurate information about tree clearing and building on a site with protected vegetation considerations, it is recommended to contact your local Council or a local arborist for guidance.

Questions to ask

- Where is the protected vegetation located on the property?
- Is the identified vegetation "native" or an introduced species?
- How does this consideration positively or negatively impact the property?

LEGEND

 Selected Property

Bushfire Risk

Is the property in a potential bushfire area?

THINGS TO KNOW

Being located in a bushfire risk area does not guarantee a bushfire occurrence but signifies that the property has been identified as having conditions conducive to supporting a bushfire. Factors such as a dry climate, dense surrounding vegetation, and steep landscapes all contribute to the impact and intensity of a bushfire.

If you plan to build or develop in a bushfire area, your construction may need to adhere to specific requirements to ensure resident safety. This could involve proper building siting, creating barriers and buffer zones around your home, and using appropriate building design and materials to minimise the impact of bushfires.

Note: The map provided is based on broad government modelling assumptions and does not assess each site individually or guarantee bushfire immunity.

Newly subdivided lots may have already considered bushfire risk in the design of the subdivision, potentially involving vegetation removal, and gained approval from the Council. You should speak with the Council or a building certifier to identify any relevant safety requirements for your site.

Questions to ask

- What is the significance of the bushfire risk to the property?
- What can be built in a bushfire risk area?
- Can bushfire impacts be reduced through design?

LEGEND

 Selected Property

Steep Land

Is there significant slope on this property?

Sources: Department Of Resources

THINGS TO KNOW

Understanding how the land slopes on your property is important to know for building construction, soil and rainwater management purposes. A sloping block is a title of land that has varying elevations. Whether the slope is steep or gradual, knowing the land's topography helps in planning and building structures on site.

A flat block of land is generally easier to construct on but sloping land has other benefits if the building is designed well, such as improved views, drainage and ventilation. Properties with steep slopes pose challenges, particularly regarding soil stability. Retaining walls and other stabilisation measures may be necessary to prevent erosion and ensure the safety of structures.

For an accurate assessment of your property's slopes and suitability for construction, consult a surveyor or structural engineer.

Note: The information provided is based on general modelling assumptions and does not evaluate each site individually. Changes in the landscape such as retaining walls may have occurred. The contour lines provided show elevation measurement above sea level.

Questions to ask

- Where is the steep land and/or landslide risk located?
- How does this affect what can be built on the property?
- Can the steep land and/or landslide risk be improved?

LEGEND

-  Selected Property
- Property Est. Fall: ~0m
-  Property High: ~5m
-  Property Low: ~5m

Noise

Is the property in a potential noise area?

Sources: Department Of Transport And Main Roads, Brisbane City Council

THINGS TO KNOW

Some properties may be located near uses that generate noise such as road, rail and airport traffic. These noise generating uses can cause some nuisance for the occupants of a building if it is loud and consistent. When building, extending or developing property in a noise affected area, you may be required to consider design features that reduce noise for the residents of the dwelling.

Common design features some local Councils may require include installing double glazing windows, noise attenuation doors and fences. You may wish to contact an acoustic engineer for more information.

Note: The map provided identifies noise based on government broad modelling assumptions and does not assess each site individually or any nearby sound barriers such as acoustic fences, buildings, vegetation, or earth mounds.

Questions to ask

- What is the significance of the noise impacts?
- How do noise impacts affect renovations, extensions or new builds?
- How can noise impacts be reduced through design?
- How might you confirm the noise levels and whether they are acceptable?

LEGEND

-  Selected Property
-  Mod. To Low Noise (Rail)
-  Mod. To Low Noise Area (Council)

Water

Are there any water pipes nearby?

Sources: Urban Utilities

THINGS TO KNOW

Water mains carry potable water from water treatment facilities to properties to use for drinking, washing and watering of gardens. These mains are owned by Council or a local Service Authority. It is important to locate these pipes before you start any underground work, to avoid costly damage to the mains.

If you are planning to develop or renovate a property and the building work is close to or over water and sewer mains, you may be required to obtain approval from local Council or the Service Authority. You should also contact a surveyor or register professional to identify any underground services before commencing any work.

Note: The information provided identifies the location of large government maintained pipes only and does not identify all privately owned pipes that may exist underground. The location of pipes in relation to the aerial or satellite image provided may be skewed because of the angle the imagery is captured from.

The indicative pipe location is provided as a guide only and not relied upon solely before undertaking work.

Questions to ask

- Where is the water infrastructure located on the property?
- What impact might this have on renovations, extensions, new builds or redevelopment?
- What can be built over or near the identified water infrastructure?

LEGEND

-  Selected Property
-  Water Connection
-  Water Pipe

Sewer

Are there any sewer pipes nearby?

Sources: Urban Utilities

THINGS TO KNOW

Sewer mains carry wastewater away from properties to sewage treatment facilities. These mains are owned by Council or a local Service Authority. It is important to locate these pipes before you start any underground work, to avoid costly damage to the mains.

If you are planning to develop or renovate a property and the building work is close to or over water and sewer mains, you may be required to obtain approval from local Council or the Service Authority. You should also contact a surveyor or register professional to identify any underground services before commencing any work.

Note: The information provided identifies the location of large government maintained pipes only and does not identify all privately owned pipes that may exist underground. The location of pipes in relation to the aerial or satellite image provided may be skewed because of the angle the imagery is captured from.

The indicative pipe location is provided as a guide only and not relied upon solely before undertaking work.

Questions to ask

- Where is the sewer infrastructure located on the property?
- What impact might this have on renovations, extensions, new builds or redevelopment?
- What can be built over or near the identified sewer infrastructure?

LEGEND

-  Selected Property
-  Sewer Maintenance Structure
-  Sewer Pipe
-  Sewer Pipe Connection

Stormwater

Are there stormwater pipes on or near the property?

Sources: Brisbane City Council

THINGS TO KNOW

Council stormwater pipes collect piped roof water and surface water from a number of properties and direct flows away from buildings. These pipes are owned by Council and feed into large pipes which collect water from the street curb and channel.

You will need government approval to build over or near a large stormwater pipe. It is important to locate these pipes before digging to ensure they are not damaged. Please contact the local authority to access detailed plans that show the size and depth of pipes.

Note: The information provided identifies the location of large government maintained pipes only and does not identify all privately owned pipes that may exist underground.

The location of pipes in relation to the aerial or satellite image provided may be skewed because of the angle the imagery is captured from. The indicative pipe location is provided as a guide only and not relied upon solely before undertaking work.

Questions to ask

- Where is the stormwater infrastructure located on the property?
- Is there a lawful point of stormwater discharge available to the property?
- What impacts might this have on renovations, extensions, new builds or redevelopment?
- What can you build over or near the identified stormwater infrastructure?

LEGEND

- Selected Property
- Inlet Structure
- Maintenance Structure
- Stormwater Pipe Or Culvert

Power

Are there any power lines on or near the property?

Sources: Energex

THINGS TO KNOW

Power lines (overhead or underground) transmit electricity from power stations through cables to individual properties. It is important to locate these cables before digging or undertaking overhead work near power lines, to ensure they are not damaged or workers injured.

Note: The map provided identifies the general location of large power mains identified by the service authority. The location of cables and power lines in relation to the aerial or satellite image provided may be skewed because of the angle the imagery is captured from. The indicative cable location is provided as a guide only and not relied upon solely before undertaking work. Please contact the relevant Service Authority to find out further detailed information.

Questions to ask

- Where is the power infrastructure located on the property?
- Is there an electricity connection available to the property?
- What impact might this have on renovations, extensions, new builds or redevelopment?

LEGEND

-  Selected Property
-  Overhead Power Line (LV)

Public Transport

Is there any public transport stops nearby?

Property Search - Advice to Applicant

Property Search reference **996024**

Date: 03/03/2026

Search Request reference: **187787783**

Applicant details

Applicant: SearchX Ltd
orders@search-x.com.au

Buyer: SearchX Pty Ltd

Search response:

Your request for a property search on Lot 125 on Plan RP34489 at 75 Nellie St, Nundah Qld 4012 has been processed.

At this point in time the Department of Transport and Main Roads has no land requirement from the specified property.

Note:

1. Development proposed on this property may require approval under the Planning Act. This may include referral to the State Assessment and Referral Agency for assessment of the impacts to state transport corridors and infrastructure.
2. New or changed access between this property and a state transport corridor will require approval under the Transport Infrastructure Act.
3. To see what other State Government planning has been identified in your area, please refer to the online DA Mapping system. Refer to the State Transport interests under the SARA layers to identify what interests TMR has in your locality.
< <https://planning.dsdmip.qld.gov.au/maps/sara-da>>
4. Any properties located in proximity to a current or future State transport corridor may be affected by noise. For existing corridors, refer to the online SPP interactive mapping system. Select the Information Purposes and refer to the Transport Infrastructure. If the property is located in a mandatory transport noise corridor then Mandatory Part 4.4 of the Queensland Development Code will apply.
< <https://planning.dsdmip.qld.gov.au/maps/spp>>

Rating and rebate information

As a ratepayer, it is your responsibility to ensure that the charges and rating category are correct and matches your property's predominant use.

Rating information and Category - general rates are calculated based on the land valuation issued by the Queensland Government and the rating category of the property. Please refer to the rating category statement or visit brisbane.qld.gov.au/rating-categories for more information.

Change your contact details - It is important you advise Council of changes to your phone number, postal and email addresses by phone on 07 3403 8888 or visit brisbane.qld.gov.au/change-rates-contact-details to notify us online.

Rebates - Council offers a range of rates rebates, including pensioner, not for profit and owner occupier. Phone 07 3403 8888 or visit brisbane.qld.gov.au/rates-rebates for more information.

Interest - Compounding interest of 12.12% per annum will accrue daily on any amount owing immediately after the due date.

Payment options

Online

To pay online go to brisbane.qld.gov.au/pay-rates Payment is accepted by American Express, MasterCard or Visa credit card*. Minimum payment \$10.

Direct Debit

The Queensland Government waste levy for general waste is now \$125 per tonne. Council has received a payment of \$36,822,816 for the 2025-26 financial year from the Queensland Government to mitigate impacts from the Waste Levy on households. This payment is only around 70% of the amount required to be paid by Council to the Queensland Government as a levy for household waste to landfill. The Waste Utility Charge covers costs associated with managing waste in Brisbane, including the gap between the Queensland Government levy charged to Council and the 70% rebate received by Council.

Legend

PIPE LEGEND: GAS TYPE AND PRESSURE

	Low pressure	Medium pressure	High pressure	Transmission
Natural gas				
Natural gas – proposed				
LPG (yellow dash)	<i>not applicable</i>			<i>not applicable</i>
Hydrogen blended (aqua dash)	<i>not applicable</i>			<i>not applicable</i>

PIPE LEGEND: SPECIAL DESIGNATION

	Low pressure	Medium pressure	High pressure	Transmission
Critical main (yellow highlight)				
Casing (grey highlight)				<i>not applicable</i>

These designations typically apply to any pipe type and pressure

PIPE LEGEND: OTHER STATUS

Abandoned pipe	
Idle or inactive pipe	

ABBREVIATION

BoK	Back of kerb	FoK	Front of kerb
C	Depth of cover	NTI	Not tied in
CP	Cathodic protection		

OBJECT SYMBOLS

Valve		CP test station		Syphon	
Buried valve		CP anode		Marker	
Regulator station		CP bond wire		Part service ^A	
Gas connected property		CP rectifier terminal		^A A live gas service terminated underground within the property boundary, available for future extension to the gas meter.	

PIPE CODE AND MATERIAL

P*	Polyethylene (PE)	CU	Copper
P3	Polyvinyl chloride (PVC)	N2	Nylon
S*	Steel	W2	Wrought galv iron
C*	Cast iron	W3	PE coat wrought galv iron

INTERPRETATION EXAMPLE

40P6 in 80C2	High pressure, 40 mm polyethylene in an 80 mm cast iron casing
63S8	Medium pressure, 63 mm steel

Pipe diameter in millimetres is shown before pipe code.
40P6 = 40 mm nominal diameter

This map was created in colour and should be printed in colour

WARNING
 Telstra plans and location information conform to Quality Level "D" of the Australian Standard AS 5488-Classification of Subsurface Utility Information. As such, Telstra supplied location information is indicative only. Spatial accuracy is not applicable to Quality Level D. Refer to AS 5488 for further details. The exact position of Telstra assets can only be validated by physically exposing it. Telstra does not warrant or hold out that its plans are accurate and accepts no responsibility for any inaccuracy. Further on site investigation is required to validate the exact location of Telstra plant prior to commencing construction work. A Certified Locating Organisation is an essential part of the process to validate the exact location of Telstra assets and to ensure the asset is protected during construction works. See the Steps- Telstra Duty of Care that was provided in the email response.

Some examples of conduit type and size:

A - Asbestos cement, P - PVC / Plastic, C - Concrete, GI - Galvanised Iron, E - Earthenware

Conduit sizes nominally range from 20mm to 100mm

P50 50mm PVC conduit
P100 100mm PVC conduit
A100 100mm asbestos cement conduit

Some Examples of how to read Telstra Plans

The 5 Ps of Safe Excavation

<https://www.byda.com.au/before-you-dig/best-practice-guides/>

- Plan**
Plan your job. Use the BYDA service at least one day before your job is due to begin, and ensure you have the correct plans and information required to carry out a safe project.
- Prepare**
Prepare by communicating with asset owners if you need assistance. Look for clues onsite. Engage a Certified Locator.
- Pothole**
Potholing is physically sighting the asset by hand digging or hydro vacuum extraction.
- Protect**
Protecting and supporting the exposed infrastructure is the responsibility of the excavator. Always erect safety barriers in areas of risk and enforce exclusion zones.
- Proceed**
Only proceed with your excavation work after planning, preparing, potholing (unless prohibited), and having protective measures in place.

Statutory Encumbrance Annexure

Property: 75 Nellie Street, Nundah QLD 4012

This report details statutory encumbrances that directly impact the property.

1. APA Group

APA Group mapping does not show any gas pipelines, valves, regulators, or associated gas infrastructure within the boundaries of the property. Gas infrastructure is shown within the adjoining road corridor near the property boundary; however, no APA assets are located inside the subject land.

2. Brisbane City Council

No Brisbane City Council infrastructure assets are located within the property boundary. The council response plan identifies “No Assets” within the subject land.

3. NBN Co Limited

Telecommunications infrastructure associated with the NBN network services the property. NBN lead-in and service infrastructure connect the telecommunications network from the street corridor into the property, indicating that NBN assets enter the land.

4. Urban Utilities

Urban Utilities mapping indicates water and sewer infrastructure within the surrounding road corridor. These assets are located outside the property boundary and do not extend into the subject land.

5. Telstra Corporation Limited

Telecommunications mapping indicates network infrastructure within the surrounding street network, with service infrastructure providing connectivity to the property. Telecommunications lead-in infrastructure associated with the network servicing the property extends into the land and directly affects the property.
